46TH ANNUAL GELBVIEH AND BALANCER BULL SALE

Monday, Feb. 23 • 1:00 p.m. CST

65 Bulls & 20 Heifers Sell • At the Ranch: 20453 Cendak Road, Pierre, SD

Greetings!

Welcome to our 46th Annual Gelbvieh and Balancer Bull Sale. We would like to thank our past customers for your continued support and confidence in our program over the years. Your friendship has meant the world to us. We look forward to continuing to be your source for performance-driven, maternally backed, commercially focused Gelbvieh and Balancer genetics.

We believe Gelbvieh and Balancer genetics produce the hardest working females in the beef industry. The executive director of the American Gelbvieh Association, Harrold Bertz, recently toured the Meat Animal Research Center in Clay Center, Nebraska, and returned with information that comes as no surprise to Gelbvieh users—Gelbvieh cows produce big calves. Research published in the Journal of Animal Science confirmed that Gelbvieh-sired females produce 22.7 more pounds of calf at weaning than any other British or Continental breed when mated across breed combinations. In today's market, that equates to nearly \$100 per head on 550-pound steers, based on unbiased, peer-reviewed research.

Our focus is building the optimal female that can thrive in any environment. We place maximum emphasis on maternal traits including udder quality, fertility, fleshing ability, and longevity. Our cattle run in large pastures, traveling long distances for water and climbing steep elevations, making structural soundness and efficiency essential. The sires we utilize are selected to produce high-performing, fertile, easy-fleshing cattle that are problem-free and profitable, with the goal of taking the guesswork out of the equation for our customers.

This year's sale offering has exceeded the goals we have set for our program. The bulls are uniform in type regardless of breed percentage—thick, long-spined, easy fleshing, and exceptional on their feet and legs. The 2025 calf crop was weaned in mid-August due to drier pasture conditions and has excelled on our feed program. Bulls are developed on a high-fiber, roughage-based ration with ample space to exercise and structural longevity in mind. Our natural calves were raised on rugged pastures without supplementation and returned with excellent weaning weights.

Our embryo transfer program remains a key focus, allowing us to accelerate our most productive genetics while continuing to utilize our strongest cow families. We are grateful to work with Brett Stevens, who provides outstanding care to our ET calves from calving through weaning. At weaning, ET calves are brought to the ranch, integrated with the natural calves, and managed together as a group.

You will notice a few additional lots in this year's offering, as we have opened our replacement pens to offer a select group of females from the heart of our program. These females represent our highest-performing genetic lines, with several being maternal or full sisters to bulls in the sale.

We invite you to stop by the ranch prior to the sale to view the bulls and visit with us about your program's needs. The cow herd is also available for viewing if you would like to see our operation in its entirety. We look forward to seeing you on February 23rd at the ranch, northeast of Pierre, South Dakota.

~ Wes, Brittney, Owen, Jim and Barb

Your source for performance driven, maternally backed, commercially focused Gelbvieh and Balancer genetics.

Auctioneer:

Lynn Weisharr: 605-641-7707

Ring Service:

Dan Piroutek, Tristate Livestock News:

Contacts and Sale Day Phones:

Jim Beastrom: 605-224-5789 (H); 605-280-7589 (C)

Wes Spencer: 605-280-1536

Brittney Spencer: 605-280-0204

Paul Duxbury: 605-350-9268

Sale Location Directions: From West: 1.4 miles east of Triple M Truck Stop on Highway 14/83, then turn north on Cendak Road for 0.5 miles. From East: 11.9 miles west of Highway 14/83 junction west of Blunt, then turn north just after mile marker 235 on Cendak Road for 0.5 miles. GPS address is 20453 Cendak Road, Pierre, SD 57501.

Accommodations: Ramkota Inn, 605-224-6877, livestock trailer accessible.

Herd Health: All bulls will be delivered with proper health papers and a breeding soundness exam.

DNA Pending: DNA test for coat color, horned polled/status, and parentage have been completed and are listed in the catalog.

Supplemental Data: Scrotal circumferences will be taken prior to the sale and provided on a supplement sheet, along with any updated information from DNA testing.

Sight Unseen Policy: We will guarantee the complete satisfaction of all sale lots purchased sight unseen. All bids will be handled with the highest appropriateness and confidentiality.

Breeding Guarantee: The breeding period is defined as 90 days following the first turn out of a bull. Beastrom Ranch guarantees purchases selling for \$3,500 or more at a value of 100% credit less \$1,800 (considered the salvage value of the bull) toward the purchase of one bull in the following year's bull sale. If the new purchase costs less than the credit amount, no further credit is due. One purchase credit cannot be used on multiple bulls (1 for 1 only). In the event of death or injury, please contact us as soon as possible. If a replacement bull is needed to help you through the breeding season, we will provide one if one is available.

Insurance: To reduce your risk and protect your investment, it is recommended that you purchase livestock mortality insurance on your purchases. Information will be available on sale day.

Delivery: We will keep the bulls free of charge until April 15, 2026. Arrangements can be made to feed the bulls until June 1, 2026 at a rate of \$3.50 per day. If you choose to have us care for your purchase, you will be doing so at your own risk and pick up/delivery will be the purchasers responsibility. All bulls will be delivered with a proper breeding soundness exam. Delivery in South Dakota will be free of charge and arrangements can be made for delivery anywhere in the US, Canada, and Mexico.

Liability: People that attend this sale do so at their own risk, we are not responsible for accidents.

Semen Interest: We will be retaining a 1/3 semen interest on all sale bulls, unless otherwise stated.

Volume Discount: 5% on 5 bulls; 10% on 10 or more bulls

Sale Catalog Lot Information Key:

Any animal with "ET" at the end of its name is the result of embryo transfer.

We have listed what we feel are the most important EPDs for our customers, without overwhelming you with data. You are welcome to look up each lot's full line-up of EPDs by using the Animal Search feature at Gelbvieh.org.

Any bull with "GE EPDs" listed means the EPDs have been enhanced with genomic information through DNA testing.

Because we run multi-sire pastures, we DNA sire verify all calves. Some lots have also been DNA dam verified.

Adjusted 365 yearling weight.

The average daily gain of the bulls within our bull test period.

Actual weight of lot at birth. BWs for ET lots are not used as part of their data per AGA.

Weaning weight adjusted to 205 days.

Age of the mother at the time lot was born.

The animal's breed classification and percentage Gelbvieh.

The animal's birth weight.

The animal's registration number.

The animal's coat color is displayed here.

- (T) = By DNA Test; (P) = By Pedigree
- Homo Black means the lot is homozygous black by DNA test (all calves should be black).
- Double Black means both the lot's parents are black.
- All red lots carry two red genes and animal will pass one red gene to all calves.

The lot's polled/horned/scurred status is displayed below the coat color row.

- (T) = By DNA Test; (P) = By Pedigree
- Homo Polled means the lot is homozygous polled by DNA test (all calves should be polled).
- Double Polled means both the lot's parents are polled.
- Scurred means the animal carries small scurs.

Videos will be available at BeastromRanch.com and DVAuction.com.

EPD Definitions:

Listed below are the definitions of American Gelbvieh Association EPDs and the units in which they are published.

Maternal traits

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

Milk (Milk): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

Stayability (STAY): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Docity (DOC): Is reported as a percentage, with higher numbers indicating a higher percent of offspring receiving a disposition score of 1 (docile).

Scrotal circumference (SC): Predicts the difference, in centimeters, of scrotal circumference of an animal's male offspring at yearling compared to the SC of other animals' male offspring.

Growth traits

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

Carcass traits

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MARB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Efficiency traits

Dry matter intake (DMI): The genetic difference in pounds of expected average daily dry matter intake of progeny.

Indexes

Indexes are tools that allow producers to select for several EPDs at once, making selections more

efficient than selecting on one trait at a time. Indexes weigh traits based on their importance to a producer's bottom line by using a trait's economic and genetic value. Indexes are a good way to put selection emphasis on traits that are economically relevant.

Feeder Profit Index™ (FPI™): Envisioned as a completely terminal index, FPI assumes all calves are marketed as finished beef carcasses priced on a value-based grid. Thus, it shouldn't be used in production scenarios where replacements are kept from these matings. The new FPI formulation more precisely weights Economically Relevant Traits (ERTs) available for selection, including the key carcass traits of Carcass Weight (CW), Ribeye Area (REA), and Dry Matter Intake (DMI) that were not included in the original formulation. The new FPI also weights Fat Thickness (CFAT), post-weaning Average Daily Gain (ADG), and Calving Ease Direct (CED). Carcass value determined by carcass weight, quality, and yield grade influencing traits accounts for approximately 75% of the index as principal revenue drivers. Dry Matter Intake (DMI) captures differences in expected costs to the terminal carcass endpoint.

Total Profit Index (TPI): Combining replacement female retention from the herd with carcass endpoint for marketed surplus heifers and all steers, TPI balances both maternal and terminal selection criteria. Because of the challenges faced by commercial cattlemen by the antagonisms in selection for this production scenario, TPI includes the largest and most diverse set of EPDs in the model, including carcass traits as the primary revenue drivers with cow Mature Weight (MWT), Stayability (STAY) and Dry Matter Intake (DMI) as cost drivers.

GE-EPDs • Next Evolution marks a strong start to this year's sale offering. He offers a significant birth-to-weaning spread while being raised by a moderately framed, productive first-calf heifer. His sire, BABR 114Y, is recognized for producing females that remain in the herd for multiple generations due to their fertility, structural soundness, and consistent productivity. Next Evolution features substantial depth and thickness, complemented by a robust foot that supports his sturdy build. He exhibits a deep body profile with efficient fleshing and a refined front third. This individual demonstrates versatility as a breeding prospect, with the capability to produce both high-performing feeders and premium replacement heifers. EPDs rank in the top 5% for PG 30; top 15% for WW and CW; top 20% for FPI; top 25% for YW, TM, CEM and TPI; top 30% for MARB; and top 35% for CREA. Retaining ½ semen interest.

GE-EPDs • Annuity 5512N is a full brother to Lot 1 in our 2025 sale and displays the same high level of structural integrity and muscular definition, along with exceptional rib shape and capacity. His dam is a moderately framed, well-constructed female renowned for her productive capabilities within our herd. Her two calves have an average weaning weight of 770 lbs. with a ratio of 105, all while maintaining a moderate actual birth weight. Annuity is impressive from every angle and has been one that has been fun to watch develop. Annuity's EPDs rank in the top 10% for \$Gain and TM; top 15% for WW, YW, DOC, and MK; top 20% for MARB; and top 35% for SC and TPI. **Retaining ½ semen interest.**

GE-EPDs • 4414N will be the last natural calf out of BABR 1001Y, who was productive for 13 years. The average WW on the 6 sons she produced is 749 lbs. She entered the donor program last spring producing 13 eggs on her first flush at her advanced age. She is a grand-daughter of one of the first Angus females we purchased to produce Balancer cattle. This bull calf offers added length of spine, plenty of muscle mass over his top and is smooth in his overall make up. A bull we feel could be used on both heifers and cows due to his added calving ease. EPDs rank in the top 10% for DMI and STAY; top 20% for BW; and the top 25% for CEM.

Sire of Lots 2-8, 10-11, 67, 70-71

Lot 6 • BABR 5506N ET

Lots 6-8 Donor Dam • BABR 3127A

3127A is a female that has been a mainstay within our program over the past 12 years, and we plan to continue to utilize her in our ET program for as long as we can. Productively, her progeny count is 21. Eight of those have been females that we have added into our herd or sold to another breeder. Twelve bulls have been sold over the years in our bull sale, and have an average weaning weight of 770 lbs., with a ratio of 104. Three of her sons have gone on to become AI sires utilized within the industry. You will find her influence throughout this catalog. The mating that produced Lots 6, 7, and 8 has become one of our favorites due to their consistency in progeny, fleshing ability, and attractive higher percent Gelbvieh package. These genetics are maternal driven, and we are looking forward to the impact they will have within our program.

Lot 9 • BABR MEGA WATT 5517N

DONOR DAM OF LOTS 9-12 • BABR 9200G ET

BABR Evangeline 9200G ET is one of our newest additions to the donor pen. She combines added rib shape and fleshing ability with performance, foot size, and body mass while maintaining a feminine appearance. She is a maternal sister to the reference sires BABR Onrush 3001L ET and BABR 0400K ET and the dam of Lot 37. Lot 9 is the natural calf she raised this past year and Lots 10 and 11 are full ET brothers to our 2026 Black Hills Stock Show entry. The ET sisters are standouts in the replacement pen and have the same look as their donor dam. 9200G's EPDs rank in the top 1% for CW and CREA; top 2% for WW; 4% for YW; 5% for FPI; 10% for TM and \$GAIN; 25% for TPI; and 30% for YG.

Lot 13 - GE-EPDs • 5519N is an exciting genetic combination. His dam is a young Angus female that is quickly becoming a favorite in production. She, and her ET siblings, are moderate-framed, easy-fleshing, and highly productive females with outstanding dispositions. 5519N himself offers a unique combination of calving ease and performance without sacrificing maternal. He offers a WW ratio of 112 and YW ratio of 105, and his EPDs rank in the top 15% for BW, CW, and CEM; top 20% for WW, PG30, and FPI; top 25% for CEM; 30% for WW; and 35% for %GAIN.

Lot 14 Dam • BEAS 9712G

Lot 14 - GE-EPDs • 5519N has been one that has had "the look" early on. He is long bodied with plenty of thickness and dimension over his top. He is angular and has a herd bull look with a big birth-to-weaning spread. His EPDs rank in the top 5% for DMI; top 15% for \$GAIN; top 15% for DOC; top 20% for CREA and YG; and top 25% for FPI and TPI.

Lot 15 - GE-EPDs • 5522N is one of the most massively constructed bulls in the sale. He thick from front to back with an abundance of rib shape and overall dimension. He is exactly what we were hoping to produce when we mated OnRush to Reform daughters. He offers a 104 WW ratio and a 107 YW ratio and EPDs that rank in the top 5% for WW; top 10% for YW and CW; top 15% for DOC; top 20% for FPI and \$GAIN; top 25% for TM; top 20% for STAY and CREA; and top 35% for CED.

GE-EPDs • OnRush is a maternally driven herd sire that does not lack in performance, growth, or feed efficiency in his offspring. He combines moderate birth weights with explosive growth, added length of body, and tremendous muscle mass. This is a bull that works in all aspects of today's cattle industry. His daughters are easy to look at and sons are high performing. We are getting reports of added fleshing ability and high gains on his sons that are being backgrounded. OnRush's EPDs rank in the top 10% for WW, \$GAIN, PG30, and FPI; top 15% for TPI; top 20% for YW, CREA, and CW; and top 25% for HP and MARB.

GE-EPDs Pending • I am certain you will notice this bull is not in numerical order in the catalog. When all the results of our DNA testing were finally complete, this bull had a sire correction and we wanted to keep him with his sire group in the catalog. 5511N offers plenty of growth, frame, and length of body along with added foot size and natural fleshing ability. His dam is a full ET sister to BABR Branded Man and is becoming a powerhouse in production. He has a big birth-to-weaning spread with a WW ratio of 102 and YW ratio of 105. He ranks in the top EPD percentiles for many traits but will have updated genomically-enhanced EPDs on sale day.

Lot 18 • BABR 5525N

Lot 19 • BABR 5526N

GE-EPDs • This is one of the younger black bulls in the sale offering but he certainly does not lack the extras that make him stand out. He is attractive, thick, and well balanced. His dam is one of our 4267B daughters that are powerfully constructed and front pasture producers. 5525N's EPDs rank in the top 4% for \$GAIN; top 20% for CREA and YG; top 30% for DMI and TPI; and top 35% for CW.

Lot 19 - GE-EPDs • 5526N is long-spined and thick from one end to the other. He offers added growth, muscle mass, and performance. He has an attractive, yet rugged herd bull with plenty of skeletal stoutness and a large foot to carry him. His EPDs rank in the top 10% for CW; 15% for CREA; 20% for WW and YG; top 25% for \$GAIN and FPI; and top 30% for WW.

GE-EPDs • 0400K is one of our walking herd sires and is a full ET brother to BABR OnRush 3000L ET. He offers the same length of body, muscle mass, and overall thickness but might have a slightly larger foot to carry him. His EPDs rank him in the top 10% for WW and PG30; the top 15% for YW and CW; top 20% for \$GAIN; top 25% for HP; top 30% for MARB; and top 35% for CREA.

BABR "El Viejo" 0400K ET
 Sire of Lots 18-21, 38, 62, 80-81

Lot 22 • BEA 500N ET

Lots 22-25 are full ET brothers out of the young donor dam BEA 0610D. She comes from the heart of our ET program and is a female we have been utilizing to add more Gelbvieh genetics to our sale line up. She is a moderate made, easy-fleshing female that is flexible on the go. Her progeny count is up to 8 head in her first two years of production. She will have 7 of those calves in this year's catalog. This set of purebred bulls offers a little something for everyone but each of them excels phenotypically and genotypically. You will also find their full ET sisters as Lots 77 and 78.

Lot 22 - GE-EPDs • 500N is the largest framed of the flush brothers. He is thick made, well balanced, and has been a standout all year. He has gained well with a large weaning-to-yearling spread. His EPDs rank in the top 2% for CW; top 3% for FPI; top 4% for TPI; top 10% for WW, YW, STAY, and MARB, and top 15% for \$GAIN.

Lot 23 • BEA 505N ET

Lot 23 - GE-EPDs • 505N is a more moderate bull that is thick-ended and smooth in his overall make up, having a clean sheath and added volume. His EPDs rank in the top 4% for FPI and TPI; top 5% for CW; top 10% for MARB; top 15% for BW and CEM; top 20% for \$GAIN and STAY; and top 20% for WW and YW.

5580N is the youngest bull in the offering but he excels in growth, volume, and scrotal development. He is sired by BABR 3001L ET (a son of BEA 3127A and donor dam to Lots 6-8). The 3001L daughters we have in the replacement pen are easy-fleshing and loaded with volume and rib shape. 5580's dam is one that Owen purchased from September Farms, and she is a moderate-made, good-footed female that is fitting into our program well. His EPDs rank in the top 10% for YG; top 20% for STAY; top 30% for DOC; and top 35% for SC and DMI.

GE-EPDs • 5527N is a moderate-framed, long-bodied, angular made bull that moves around the pen with ease. His dam has been a top bull producer for our program, bringing home heavy weaning calves combined with an early breed back annually. His EPDs rank in the top 15% for TM; top 20% for CED and STAY; top 25% for BW and DMI.

Lot 31 • BABR COAL TRAIN 5510N

Lot 31 Dam • BABR 8240F

Lot 31 - GE-EPDs • Coal Train is bull with a commanding presence – he is one that you can't help but find when you enter the pen. He is deep-sided, soggy-middled, and hits his track every time. He has plenty of extension and lays in nicely though his shoulder. His dam, 8240F, has been what might arguably be our top bull-producing female. She has had 5 bulls with an average WW of 789 lbs., and average YW just shy of 1400 lbs. Coal Train has an impressive set of stats himself, with WW and YW ratios of 109. We feel this bull is perfect blend of maternal, growth, and consistency. His EPDs rank in the top 3% for \$GAIN; top 4% for TM; top 10% for MK and YW; top 15% for WW, SC, and MARB; top 20% for CW; top 25% for FPI and TPI; and top 35% for CED.

Retaining ½ semen interest.

Lot 32 - GE-EPDs • 5531N is one of the most attractively designed bulls in the sale offering. He is long-fronted and angular in his construction, with plenty of muscle mass and dimension. He has a large birth-to-weaning spread, with a WW ratio of 105 and YW ratio of 106. His EPDs rank in the top 10% for CW; top 15% for TPI and FPI; top 20% for MARB; top 25% for \$GAIN and YW; and 35% for TM.

GE-EPDs • 5529N is the only Jesse James sired bull in this year's offering, but he does not disappoint. He is long-spined, thick-made with an angular attractive look. He offers plenty of depth and dimension and hails from a productive cow line. His dam is a maternal sister to BABR Onrush, BABR 0400K, and BABR 9200G. A full sister is one that stands out in the calving pen. He has a YW ratio of 103 and ranks in the top 25% for MARB and \$GAIN; and top 30% for WW, MK, and CW.

GE-EPDs Pending • 5532N is out of a new sire we selected from Brooking Angus because of his cow power and maternal merit. 5532N is a long-spined, attractive-made bull with added top shape and overall mass and volume. His dam is just shy of 13 years old and is still raising cattle that offer huge birth-to-weaning spreads. He has a WW ratio of 104 and YW ratio of 107. He ranks in the top percentiles for marbling and carcass weight. He will have genomically-enhanced EPDs by sale day.

We have been drawn to the Brooking Angus program over the years due to the females they continuously put out for evaluation. Renovation is a growthy bull with added calving ease and maternal genetics. As much as we like the bulls, we are extremely pleased the female counterparts in the replacement pen. They are truly what we envisioned when we selected this herd sire.

GE-EPDs • Lucca has been an outlier for growth and pounds his entire life. He started with a modest birth weight and never looked back. He is both the heaviest weaning weight and yearling weight bull in the sale offering. Lucca is long-bodied and thick from front to back with added growth and frame. He is smooth shouldered and nursed an incredible first calf heifer. Luna was our top pick of females from Goldux Gelbvieh and proved herself to be a great producer on her first try. Lucca combines added ease with above average growth and performance. We plan to add him to our lineup of AI sires this spring. Lucca's EPDs rank in the top 10% for MK; 15% for TM; 20% for YG and CED; 25% for WW; and 35% for YW. **Retaining ½ semen interest.**

GE-EPDs • 5544N is a soft-made, high-percent Gelbvieh bull that is well-balanced from all angles. He offers enough calving ease and growth to make him a versatile breeding piece. His sire is one we purchased to utilize outcross genetics from a very maternal focused program. The daughters in our replacement pen are deep-sided and easy-fleshing, and the heavy breeds appear to have added rib shape and superior udder quality. His EPDs rank in the top 1% for DMI and top 10% for CW.

518 is a moderate-framed bull that is attractive in his make up. He is long spined and good off his feet and legs. A full ET sister sells as Lot 76. His EPDs rank in the top 10% for YG; top 15% for DOC; and top 25% for CREA.

Lot 66 • BABR 4746M

Lot 66 - 4746M is an eye-catching female that is angular made without giving up fleshing ability. She is long, deep, easy-fleshing, and built to cover large pastures. 4746M has a pedigree that combines highly productive genetics and is a maternal sister to Lot 21 within this bull offering. Her EPDs rank in the top 15% for CED, DOC, and \$GAIN; and top 25% for BW, CW, and FPI. Expected calving date: 3/22/2026; safe to FAR Bandolier 431.

Lot 67 • BABR 4712M

Lot 67 - 4712M is an exciting breeding piece, sired by BABR Reform and out of the donor dam 7288D (also the mother of BABR Outbound 9304G). She herself offers tremendous length of body with plenty of depth and a solid structure. Her EPDs rank in the top 3% for \$GAIN; 10% for CEM; 15% for CED; 20% for PG30; and 30% for MILK. Expected calving date: 4/12/2026; safe to FAR Bandolier 421.

Gain:

Age of Dam: 2

421 is a bull we purchased this past year to use on heifers - he was an easy selection with his outstanding phenotype. We are currently calving our first group sired by him and they are coming moderately-sized with a lot of vigor. We are very pleased with these genetics. His EPDs rank in the top 5% for RE; top 10% for RADG, \$M, \$F, and \$C; top 15% for CED, YW, FL, \$B, \$W, and \$G; top 20% for CLAW, HS, and MARB; and the top 25% for MILK.

Lot 73 • BABR 5340N

Lot 73 - GE-EPDs • A great way to start this powerful set of open females. 5340M is attractive and angular in her make up but does not lack the body mass and skeletal structure we strive to have in our cow herd. Her dam is a maternal sibling to Lot 56, and she has done a tremendous job on her first two calves. Her sire also makes beautiful females in production. 5340M's EPDs rank in the top 10% for DMI; top 15% for DOC; and top 35% for \$GAIN.

Lot 74 - GE-EPDs • 5335N is a stout made purebred Gelbvieh female with added eye appeal and volume. She was a standout in the pasture this past summer and her dam is a moderate-framed, deep-sided female with a beautifully constructed udder. This female also has a tremendous attitude and would be suitable for any age owner. Her EPDs ranks in the top 30% for CW and top 35% for \$GAIN.

5024N ET is a full ET sister to Lot 65. These were embryos we purchased during the Eagle Pass Ranch Dispersal sale. She is long-bodied, clean-fronted, deep-sided, and sound-moving female. Her EPDs rank in the top 10% for YG; top 15% for DOC; and top 25% for CREA.

We are offering choice of these two purebred females that are from the same flush as Lots 22-25. Their donor dam, BEA 0610K, comes from the heart of our ET program and is a female we have been utilizing to add more Gelbvieh genetics to our sale line up. She is a moderate made, easy-fleshing female that is flexible on the go. Take this opportunity to evaluate two powerful, young purebred females and make the selection that best fits your operation. We will be retaining the right to two flushes on the female selected at the purchaser's convenience and our expense.

Lot 77 - GE-EPDs • 5001N ET EPDs rank in the top 1% for CW; top 2% for FPI; top 3% for WW and YW; top 4% for TPI; top 10% for DOC; top 15% for TM and \$GAIN; and top 20% for MARB.

Lot 78 - GE-EPDs • 5050N ET EPDs rank in the top 1% for WW, YW, CW, and FPI; top 2% for \$GAIN, top 4% for TPI; and top 25% for DOC.

GE-EPDs • 5325M is a moderate-framed, soft-sided female with an abundance of rib shape and volume. She floats across the pen when she travels and does not lack for eye appeal, yet this female has brood cow written all over her. Her EPDs rank in the top 15% for WW and YW; top 25% for \$GAIN; top 30% for CW and CREA; and the top 35% for TM, YG, and TPI.

5025N is an angular-fronted, deep-bodied female with a little added frame and performance. She is sired by BEA 131Y, a bull we utilized for added performance and carcass. Her dam is a direct daughter of BEA 920G, whose progeny in production have been some of our favorites. The dams of Lots 14, 15, and 33 are also sired by BEA 920G. Lot 85's EPDs rank in the top 15% for CW; top 20% for WW and YW; and top 35% for TM and FPI.
